Election/Restrictions

Claims 13-18,20,22,2328,29,32, and 33 were previously withdrawn from consideration as a result of a restriction requirement, indicated claims are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 12/15/04 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Indiano on 4/12/07.

The application has been amended as follows:

Art Unit: 3771

In claims 1,21,24,30,39, and 41, line 2 the term "system having" has been changed to --system comprising--

Reasons for Allowance

Claims 1,2,5,6,10,11,13-30,32-37, and 39-41 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the prior art of record does not teach nor render obvious the overall claimed combination of an anesthesia delivery device capable of being coupled to a ventilation system comprising: a gas port to enable a user to place an end of the flexible cannula in a desired position with the naris of the patient **as cited in claim 1**; a inspiratory gas port of the face mask being sized to slidably receive the flexible cannula for permitting the user to slidably move the cannula relative to the face mask to place the patient end of the flexible cannula in a desired position within the naris of the patient **as cited in claim 21**; a patient end configured for being received within the naris of the patient for delivering inspiratory gas to the naris of the patient **as cited in claim 30**; a patient end configured for being received with the naris of the patient for delivering inspiratory gas to the naris of the patient **as cited in claim 40**; and a patient end disposed with the dome portion and being configured for being received with the naris of the patient for delivering inspiratory gas to the naris of the patient **as cited in claim 41**. Therefore, the invention defined in claims 1,21,30,40, and 41 is considered novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3771

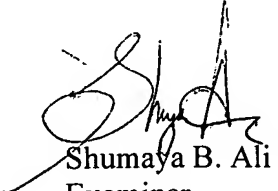

Conclusion

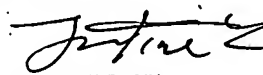

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Goldstein (US 6,012,455) is cited to teach a nasal cannula positioned with the naris of a patient.
